## **Impact of the Ishikawa Earthquake (2nd Report)**

JDI would like to express its deepest condolences to the families and friends of those who have passed away, while extending its heartfelt sympathies to all those affected by the disaster and its hopes for a speedy recovery.

As of January 9, the impact of the earthquake on JDI is as follows.

### **1. Earthquake Impact**

#### **Personnel**

JDI has confirmed that there were no employee casualties at all JDI locations in Japan.

#### **Production**

JDI's Ishikawa Fab experienced multiple burst pipes, water leaks, and boiler stoppages. JDI has now largely completed the repair of pipes and ducts, and began relaunching critical machinery and equipment on January 8. Please note that securing stable energy supplies, necessary for controlling cleanroom temperature and humidity, remains a key challenge that JDI is working to resolve.

JDI is simultaneously confirming the production status of all critical machinery and equipment in order to return to normalized production as soon as possible.

### **2. Earnings Impact**

Given that the recovery work at the Ishikawa Fab is still underway, the impact of the earthquake on JDI's FY24/3 earnings is currently unknown. Should a material earnings impact emerge, JDI will disclose it promptly.
