Consecutive JDI Inclusion in FTSE Blossom Japan Index and FTSE Blossom Japan Sector Relative Index

JDI has been selected for the second consecutive year as a constituent of the FTSE Blossom Japan Index and for the third consecutive year as a constituent of the FTSE Blossom Japan Sector Relative Index.

The FTSE Blossom Japan Index and FTSE Blossom Japan Sector Relative Index are ESG investment indices constructed by FTSE Russell, a global index provider and a wholly-owned subsidiary of the London Stock Exchange Group. The indices are designed to reflect the performance of Japanese companies that have outstanding conduct with respect to environmental, social, and governance (ESG) issues. Both indices are widely used in creating sustainable investment funds. They have also adopted as benchmarks for ESG investments by Japan's Government Pension Investment Fund (GPIF), the world's largest pension fund.

JDI believes that the fundamental purpose of a company is social contribution. In keeping with this core belief, JDI is working to contribute to a sustainable society. In its METAGROWTH 2026 growth strategy, JDI has adopted GreenTech & Sustainability as a core strategy. JDI is addressing critical environmental issues at a global level through its next-generation OLED eLEAP, which have excellent environmental performance, and HMO technologies, which help to reduce display energy consumption. JDI is committed to delivering extraordinary value to its global customers who share JDI's dedication to ESG.
