LumiFree Wins IEIJ Advanced Lighting Technology Award

JDI's LumiFree, the world's first fully customizable LED lighting system, has won the 22nd (2024) IEIJ Advanced Lighting Technology Award from the Illuminating Engineering Institute of Japan (IEIJ). The award ceremony took place on September 11th.

The IEIJ Advanced Lighting Technology Award recognizes outstanding achievements in the development of light sources, fixtures, control systems, and other related technologies with excellent functionality, performance, and energy efficiency, as well as significant improvements over conventional methods or entirely new design and manufacturing techniques that are expected to make significant contributions to society.

LumiFree allows for electrical control of the spread of light and independent two-axis light distribution control (horizontal and vertical), a breakthrough in lighting control and customization that has a broad array of uses across general lighting, specialized lighting, optical inspection systems, etc. JDI is honored that its technology has been recognized for its potential to make significant contributions to society.

Development of Light Distribution Control Device for Lighting Using Liquid Crystal

JDI's recipients of IEIJ Advanced Lighting Technology Award are :

Takeo Koito, Kojiro Ikeda, Tae Kurokawa, Koichi Nagao, Kensuke Nakamura, Keiji Takizawa
