JDI to Exhibit at MWC Barcelona 2025

JDI will exhibit its Liquid Crystal (LC) Meta-Surface reflector technology at the JAPAN Pavilion during MWC Barcelona 2025, which will be held in Barcelona, Spain from March 3 to 6. MWC Barcelona 2025 is a leading international mobile connectivity industry event. By participating in this exhibition, JDI aims to expand the global reach of its LC Meta-Surface reflectors. The JAPAN Pavilion, hosted by the Ministry of Internal Affairs and Communications, will feature 16 Japanese companies.

JDI's LC Meta-Surface reflector technology applies JDI's world-leading expertise in liquid crystals to optimize and significantly improve 5G radio wave transmissions. By reflecting and controlling high-capacity communication millimeter waves to optimize transmission capacity, JDI's LC Meta-Surface reflector technology can radically improve 5G transmission in areas with poor communication coverage, such as spaces enclosed or blocked by large buildings.

For more information on JDI's LC Meta-Surface reflector technology, please see:
