JDI Enhances Transparency with Independent Assurance Report for its Greenhouse Gas Emissions

JDI has secured third-party assurance for its Greenhouse Gas (GHG) emissions data for FY24/3. This is an important step for JDI as it works to further enhance the accuracy, reliability, and transparency of its GHG emissions.

In this GHG emissions data verification, JDI received third-party verification from the SOCOTEC Certification Japan, aligning with the international standard JIS Q 14064-3:2023 (ISO14064-3:2019), and obtained an assurance report. This enables JDI to deliver data of heightened reliability and transparency to its stakeholders.

JDI recognizes Climate Change Mitigation as a pivotal management issue and is working to reduce CO₂ emissions from its business activities and using renewable energy. JDI has long maintained its certification for ISO14001:2015, an international standard for environmental management systems, demonstrating its enduring commitment to environmental responsibility. In addition, JDI is dedicated to information disclosure in alignment with the recommendations of the Task Force on Climate-related Financial Disclosures (TCFD). JDI's overarching goal is to play an integral role in fostering a sustainable society.

Going forward, JDI will continue to leverage third-party verification as an effective tool and intensify its efforts towards further reduction of GHG emissions and enhancement of data reliability. JDI remains receptive to the insights and needs of its stakeholders and is committed to advancing its corporate activities in a manner that aligns with their expectations.

Verification Overview

- | | | |
|----|---------------------------|---|
| 1. | Verification Period | FY24/3 (April 1, 2023 – March 31, 2024) |
| 2. | Verification Scope (Note) | Scope 1 & Scope 2 (Location-based and Market-based)
Scope 3 (Categories: 1, 2, 3, 4, 5, 6, 7, 9, 10, 11, 12) |
| 3. | Scope of Calculation | All Japanese & global business sites (7 Japanese + 8 global) |

(Note) Scope 1	Direct emissions (Natural gas, LPG, diesel, kerosene, non-energy greenhouse gases, etc.)
----------------	--

Scope 2	Indirect emissions (Purchased electricity)
---------	--

Scope 3	Emissions in the supply chain (Purchased goods and services, transportation and distribution, use of sold products, etc.)
---------	---
