

April 2024

To all our suppliers

## **Re: Revision of the Green Procurement Guidelines**

As we have informed you, our Green Procurement Guidelines will revise and come into effect as of April 1, 2024. The reasons behind the revision included the revision of the statutory regulatory measures concerning the chemical substances in the products, as well as additions and/or changes to the threshold range in the list of the substances our customers have requested us to avoid or control.

Please review the outline of the revisions in the following section.

### **1. Revisions**

#### 1) Green Procurement Guideline

- Add Fluorine to the substances to be analyzed in "6-4-9. Others" and update the analysis method for each substance.
- The section "6-7.IMDS" is newly established.
- Add the explanations about IMDS survey in "7. Procedures from the request to the submission".

#### 2) Standard of prohibited and controlled substances in product for JDI

“Table 1: Standard of prohibited and controlled substances in product for JDI” annexed to the Green Procurement Guideline will be updated.

- Newly added prohibited substances
  - No. 52 Adhesive monomers Group I (Target is adhesives in wearable products)
  - No. 53 PFBS and related substances
- Prohibited substances whose threshold level are changed
  - No. 16 Perfluorooctane sulfonic acid (PFOS) and its salts
  - No. 25 Act on the Evaluation of Chemical Substances and Regulation of Their Manufacture, etc. Class I Specified Chemical Substances (HBCDD)
- Newly added controlled substances
  - No. 17 Adhesive monomers Group II (Target is adhesives in wearable products)
- Deleted prohibited and controlled substances
  - Benzenamine,N-Phenyl-, Reaction Products with Styrene and 2,4,4- Trimethylpentene (BNST)
  - Substituted diphenylamines

- 2-(2-aminoethylamino)ethanol

Please refer to our Website “Green Procurement Guidelines Ver.12.0” “Table 1: Standard of prohibited and controlled substances in product for JDI Ver.12.00” for details.

3) Certification of non-use of environment-related substances

The format of the “Certification of non-use of environment-related substances” form, annexed to the Green Procurement Guidelines, has been revised.

\*Acceptability of the old format

For cases in which the request for investigation has been made to our jDesc on or before March 31 documents in the old format will be acceptable provided the response is registered by the end of April. Otherwise, please register the response using the new format.

**2. Website update**

The respective texts for the revisions are scheduled to be available online on our website from **April**.
